PERSONAL STATEMENT

As a Paediatrician, my mission is to deliver excellent patient care to the community irrespective of the status, race or denominations and my vision is to strengthen the children to face tomorrow's challenges. Paediatrics is not merely treating the children when they are sick but it is a holistic care which starts from the antenatal period and involves every step of a child's growth, development and education. So, as a clinician who understands this phenomenon well, I would extend my service beyond the clinical obligation to ensure the wellbeing of children.
