

Urology - Kandy

Duration -1week (Morning Sessions)

3 Theatre days & 3 Clinic days

The topics discussed with students are,

- Introduction to urology, including symptoms, signs and history taking and examination
- Differential diagnoses of common clinical symptoms
- Urolithiasis and urinary tract obstruction
- Tumours of the urinary tract – mainly bladder, renal and prostate tumours
- Benign prostatic hyperplasia

The students will get the opportunity to take histories and examine patients with various urological conditions. In addition they will have an exposure on,

- Prostate biopsies
- Urethral catheterization
- Bladder irrigation and washouts
- Flexible cystoscopy
- ESWL (Extracorporeal Shockwave Lithotripsy)
- Pre-operative assessment and preparation of urological patients
- Post-operative management of patients – including urostomies

They would also be witnessing a wide range of urological surgeries depending on the theatre lists they visit. Some of the surgeries are,

- TURP, TURBT, Urethrotomy, Cystolitholapexy
- Ureteroscopy and IPL (Intracorporeal Pneumatic Lithotripsy)
- Pyelolithotomy, Nephrolithotomy, Nephrectomy, Urethroplasty, Orchidectomy
