

FOUNDATION IN PATHOLOGY
TUTORIAL ON ACUTE AND CHRONIC INFLAMMATION – DR. E. H. SIRIWEERA
2013/14 Batch – 08/01/2018

Students are expected to

- bring written answers to the following question.
- study the general pathology of acute inflammation, chronic inflammation and suppuration.

A 50-year-old farmer sustained a penetrating wound from a wooden splinter to his right foot.

1. Explain the pathological changes that occur due to this injury.
2. Describe the possible outcomes/consequences of this injury.
