

2015/16 Batch

Pharmacology Tutorial

CVS

20.11.2019 – 02.30 p.m. to 04.30 p.m.

A 60-year-old man with a past history of hypertension and dyslipidaemia is admitted with severe central chest pain that radiates to left arm, for six hours. The ECG shows ST segment depression in antero-lateral leads. The blood test for cardiac troponin-I is positive.

1. List the drugs that can be used in the management of this patient.
2. Explain the pharmacological basis of the use of each drug.
