

TUTORIAL – 2016/2017 Batch

Anatomy of Thorax and abdomen Module

Please bring your written answers for the Discussion.

Venue: West Lecture Theatre

Date: 08.01.2019

Time: 10.15-12.15pm

1.

1.1 Draw a labelled line diagram to illustrate ^{the} arterial supply of the stomach (50 marks)

1.2 Describe structural adaptations that prevent gastric reflux (50 marks)

2.

2.1 List the structures that form the boundaries of the inguinal canal and explain how they are arranged to prevent hernia (40 marks)

2.2 List anatomical difference between direct and indirect inguinal hernia (30 marks)

2.3 Draw a labelled line diagram to illustrate the arrangement of the rectus sheath (30 marks)

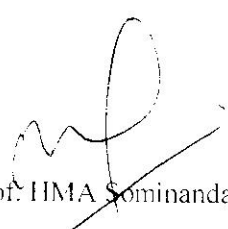

3.

3.1 Briefly describe the lymph drainage of small intestine (40 marks)

3.2 Explain the anatomical basis of the following observation:

3.2.1 Pale coloured stools and jaundice in a patient with a tumor in the head of the pancreas (30 marks)

3.2.2 Bleeding from the liver can be controlled by compressing the free border of the lesser omentum (30 marks)

Prof. HMA Sominanda
Professor

Department of Anatomy
