2018/19 Batch
Pharmacology Tutorial
Reproductive system and Urinary system
24.02.2023 (Friday) – 1.15 p.m. – 2.15 p.m.

1. Explain the basis of selecting an appropriate hormonal contraceptive method in the following situations.
 - 1.1 A 30-year-old female, 3 months postpartum (first pregnancy) wishes to have her second child in two years.
 - 1.2 A 35-year-old female with two children (aged seven and five years) who has irregular menstrual periods for the past two years.

2. A 78-year-old male presents with lower urinary tract symptoms (LUTS). Investigations confirm the presence of benign prostatic hyperplasia (BPH).
 - 2.1 List the drugs that could be used in the treatment of this patient.
 - 2.2 Discuss the pharmacological basis of the use of above mentioned drugs.
