

# Case scenarios for history taking

---

All these cases presenting at the OSCE examination would be actors. However they will try to give you realistic experience as much as possible. Therefore you must try to go through a complete process of consultation or giving information. They will try to pretend that they do not understand or that they are pathetic. In response you should explain or express empathy or offer support.

Study the checklist so that you understand the process of marking your grade. You are advised to practice role-playing following scenario with your friends while using the checklist.

1. A middle age male. With complain of long lasting abdominal pain
2. A old man with shortness of breath
3. A middle age female with complain of wheezing
4. Middle age women with missed period
5. A man with a lump in the scrotum
6. Young female with abdominal pain
7. Mother with a child for delayed walking
8. Mother with a child with severe anaemia
